

# Ordering Replacement Parts

To order replacement parts, simply call our Customer Service Department toll-free at 1-800-999-3756, Monday through Friday, 6 a.m. until 6 p.m. Mountain Time (excluding holidays). To help us assist you, please be prepared to give the following information:

- 1. The MODEL NUMBER of the product (WLBE20080).
- 2. The NAME of the product (WESLO® 2008 Folding Bench).
- 3. The SERIAL NUMBER of the product (see the front cover of this manual).
- 4. The KEY NUMBER and DESCRIPTION of the part(s) (see the PART LIST and EXPLODED DRAWING on pages 14 and 15).

# Limited Warranty

ICON Health & Fitness, Inc. (ICON), warrants this product to be free from defects in workmanship and material, under normal use and service conditions, for a period of ninety (90) days from the date of purchase. This warranty extends only to the original purchaser. ICON's obligation under this warranty is limited to replacing or repairing, at ICON's option, the product at one of its authorized service centers. All products for which warranty claim is made must be received by ICON at one of its authorized service centers with all freight and other transportation charges prepaid, accompanied by sufficient proof of purchase. All returns must be pre-authorized by ICON. This warranty does not extend to any product or damage to a product caused by or attributable to freight damage, abuse, misuse, improper or abnormal usage or repairs not provided by an ICON authorized service center, products used for commercial or rental purposes, or products used as store display models. No other warranty beyond that specifically set forth above is authorized by ICON.

ICON is not responsible or liable for indirect, special or consequential damages arising out of or in connection with the use or performance of the product or damages with respect to any economic loss, loss of property, loss of revenues or profits, loss of enjoyment or use, costs of removal, installation or other consequential damages of whatsoever nature. Some states do not allow the exclusion or limitation of incidental or consequential damages. Accordingly, the above limitation may not apply to you.

The warranty extended hereunder is in lieu of any and all other warranties and any implied warranties of merchantability or fitness for a particular purpose is limited in its scope and duration to the terms set forth herein. Some states do not allow limitations on how long an implied warranty lasts. Accordingly, the above limitation may not apply to you.

This warranty gives you specific legal rights. You may also have other rights which vary from state to state.

ICON HEALTH & FITNESS, INC., 1500 S. 1000 W., LOGAN, UT 84321-9813

# Important Precautions

**WARNING:** To reduce the risk of serious injury, read the following important precautions before using the weight bench.

1. Read all instructions in this manual before using the weight bench. Use the weight bench only as described in this manual.
2. It is the responsibility of the owner to ensure that all users of the weight bench are adequately informed of all precautions.
3. The weight bench is intended for home use only. Do not use the weight bench in any commercial, rental or institutional setting.
4. Use the weight bench only on a level surface. Cover the floor beneath the weight bench for protection.
5. Inspect and tighten all parts each time you use the weight bench. Replace any worn parts immediately.
6. Keep children under the age of 12 and pets away from the weight bench at all times.
7. Always wear athletic shoes for foot protection while exercising.
8. Do not use a barbell (not included) longer than five feet with this weight bench.
9. Keep hands and feet away from moving parts.
10. When you are using a barbell (not included), always make sure there is an equal amount of weight on each side.
11. The weight bench is designed to support a maximum of 300 pounds, including the user, a barbell and weights. Do not place more than 110 pounds, including a barbell and weights on the weight rests. Do not place more than 125 pounds on the leg lever. Do not place more than 30 pounds on each butterfly arm.
12. When using the backrest in an inclined position, make sure the adjustment tube is fully inserted into the uprights and that the locking pin is in position around the upright.
13. If you feel pain or dizziness at any time while exercising, stop immediately and begin cooling down.

**WARNING:** Before beginning this or any exercise program, consult your physician. This is especially important for persons over the age of 35 or persons with pre-existing health problems. Read all instructions before using. ICON assumes no responsibility for personal injury or property damage sustained by or through the use of this product.

# Before You Begin

Thank you for selecting the versatile WESLO®20080 Folding Bench. The WESLO®20080 is designed to help you develop every major muscle group of the body. Whether your goal is to tone your body, build dramatic muscle size and strength or improve your cardiovascular system, the WESLO®20080 will help you to achieve the results you want.

**For your benefit, read this manual carefully before using the WESLO®20080 Folding Bench.** If you have additional questions, please call our Customer Service

Department toll-free at 1-800-999-3756, Monday through Friday, 6 a.m. until 6 p.m. Mountain Time (excluding holidays). To help us assist you, please note the product model number before calling. The model number is WESLO®20080.

**Please use the drawing below to familiarize yourself with the major parts and how they fit together.**

FRIDAY Date: / /	EXERCISE	WEIGHT	SETS	REPS

Make photocopies of this page for scheduling and recording your workouts.

You should rest for a short period of time after each set. The ideal resting periods are:

- Rest three minutes after each set for a muscle building workout
- Rest one minute after each set for a toning workout
- Rest 30 seconds after each set for a weight loss workout

Plan to spend the first couple of weeks familiarizing yourself with the equipment and learning the proper form for each exercise.

COOLING DOWN

End each workout with 5 to 10 minutes of stretching. Include stretches for both your arms and legs. Move slowly as you stretch and do not bounce. Ease into each stretch gradually and go only as far as you can

MUSCLE CHART

- A. Sternomastoid (neck)
- B. Pectoralis Major (chest)
- C. Biceps (front of arm)
- D. Obliques (waist)
- E. Brachioradials (forearm)
- F. Hip Flexors (upper thigh)
- G. Abductor (outer thigh)
- H. Quadriceps (front of thigh)
- I. Sartorius (front of thigh)
- J. Tibialis Anterior (front of calf)
- K. Soleus (front of calf)
- L. Rectus Abdominus (stomach)
- M. Adductor (inner thigh)
- N. Trapezius (upper back)
- O. Rhomboideus (upper back)
- P. Deltoid (shoulder)
- Q. Triceps (back of arm)
- R. Latissimus Dorsi (mid back)
- S. Spinae Erectors (lower back)
- T. Gluteus Medius (hip)
- U. Gluteus Maximus (buttocks)
- V. Hamstring (back of leg)
- W. Gastrocnemius (back of calf)

without strain. Stretching at the end of each workout is very effective for increasing flexibility.

STAYING MOTIVATED

For motivation, keep a record of each workout. The chart on the following page can be photocopied and used to schedule and record your workouts. List the date, the exercises performed, the weight plus the numbers of sets and repetitions completed. Record your weight and key body measurements at the end of every month.

Remember, the key to achieving the greatest results is to make exercise a regular and enjoyable part of your everyday life.

Assembly

Before beginning assembly, read the following information and instructions carefully:

**Make Things Easier for Yourself!**  
Everything in this manual is designed to ensure that the assembly of our products can be completed successfully by anyone. However, it is important to recognize that your new equipment is a sophisticated product with many small parts and consequently, the assembly process will take time. Most people find that by setting aside plenty of time, and by deciding to make the task enjoyable, assembly will go smoothly.

- Assembly requires two people.
- Place all parts in a cleared area and remove the packing materials. Do not dispose of the packing materials until assembly is completed.
- Tighten all parts as you assemble them, unless instructed to do otherwise.

- For help identifying the small parts, use the PART IDENTIFICATION CHART on page 4.
- As you assemble the weight bench, make sure all parts are oriented as shown in the drawings.

The following tools (not included) are required for assembly:

- Two (2) adjustable wrenches
- One (1) rubber mallet
- One (1) standard screwdriver
- One (1) phillips screwdriver
- Lubricant, such as grease or petroleum jelly plus soapy water.

Assembly will be more convenient if you have the following tools: A socket set, a set of open-end or closed-end wrenches or a set of ratchet wrenches.

1. Before assembling this product, make sure you have read and understand the information in the box above.

Press a 1 1/2" Square Inner Cap (4) into each end of the Base (3).

Insert the 5/16" x 2 1/4" Screws (36) up through the indicated holes in the Base (3). Place a "U"-Bracket (2) on each Screw and hand tighten the Screws. **Do not fully tighten the Screws yet. Make sure the "U"-Brackets are oriented as shown in the drawing.**

2. Place the "H"-Frame (5) over the two "U"-Brackets (2) on the Base (3). Make sure the "H"-Frame is oriented as shown in the drawing.

Insert a 5/16" x 2" Bolt (6) through the holes in the "H"-Frame and the "U"-Bracket on both sides. Tighten a 5/16" Nylon Locknut (7) onto each Bolt. **Fully tighten the Screws and Nylon Locknuts used in steps 1 and 2 now.**

- Press a 1 1/2" Square Inner Cap (4) into each end of the stabilizer on the Front Leg (37).

Attach the Bench Frame (8) to the bracket (A) on the Front Leg (37) by inserting a 5/16" x 2 1/4" Bolt (1) through the bracket and the Bench Frame. Hand tighten a 5/16" Nylon Locknut (7) onto the Bolt. **Do not overtighten the Nylon Locknut; you must be able to pivot the Front Leg.**

Insert a 5/16" x 2" Carriage Bolt (33) through the Bench Frame (8) and bracket (A) and secure it with a Locking Knob (34). Insert a Small Locking Clip (16) into the indicated hole.

- Attach the Bench Frame (8) to the bracket (B) on the crossbar of the "H"-Frame (5) by inserting a 5/16" x 2 1/4" Bolt (1) through the bracket and the Bench Frame (8). Hand tighten a 5/16" Nylon Locknut (7) onto the Bolt. **Do not overtighten the Nylon Locknut; you must be able to pivot the Bench Frame.**

Insert a 5/16" x 2" Carriage Bolt (33) through the crossbar and the bracket (C) on the Bench Frame (8) and secure it with a Locking Knob (34). Insert a Small Locking Clip (16) into the indicated hole.

- Attach the Left Barbell Hook (14) to the left upright with a 5/16" Nylon Locknut (7).

Attach the Right Barbell Hook (38) to the right upright with a 5/16" Nylon Locknut (7).

# Exercise Guidelines

## THE FOUR BASIC TYPES OF WORKOUTS

### Muscle Building

The only way to increase the size and strength of your muscles is to push them close to their maximum capacity. When you progressively increase the intensity of your exercise, your muscles will continually adapt and grow. You can tailor the individual exercise to the proper intensity level in two ways:

- by changing the amount of weight used
- by changing the number of repetitions or sets performed (A "repetition" is one complete cycle of an exercise, such as one sit-up. A "set" is a series of repetitions).

The proper amount of weight for each exercise obviously depends upon the individual user. You must gauge your limits and select the amount of weight that is right for you. Begin with 3 sets of 8 repetitions for each exercise you perform. Rest for 3 minutes after each set. When you can complete 3 sets of 12 repetitions without difficulty, increase the amount of weight.

### Toning

You can tone your muscles by pushing them to a moderate percentage of their capacity. Select a moderate amount of weight and increase the number of repetitions in each set. Complete as many sets of 15 to 20 repetitions as possible without discomfort. Rest for 1 minute after each set. Work your muscles by completing more sets rather than by using high amounts of weight.

### Weight Loss

To lose weight, use a low amount of weight and increase the number of repetitions in each set. Exercise for 20 to 30 minutes, resting for a maximum of 30 seconds between sets.

### Cross Training

Many people desire a complete and well-balanced fitness program, and cross training is a very efficient way to accomplish this. One example of a balanced program is:

- Plan weight training workouts on Monday, Wednesday and Friday.
- Plan 20 to 30 minutes of aerobic exercise, such as cycling, running or swimming on Tuesday and Thursday.
- Rest from both weight training and aerobic exercise for at least one full day each week to give your body time to regenerate.

The combination of weight training and aerobic exercise will reshape and strengthen your body plus develop your heart and lungs.

## PERSONALIZING YOUR EXERCISE PROGRAM

Specifying the exact length of time for each workout, as well as the number of repetitions or sets for each exercise, is a highly individual matter. It is very important to avoid overdoing it during the first few months of your exercise program. You should progress at your own pace and be sensitive to your body's signals. If you experience pain or dizziness at any time while exercising, stop immediately and begin cooling down. Find out what is wrong before continuing. Remember that adequate rest and a proper diet are important factors in any exercise program.

### WARMING UP

Begin each workout with 5 to 10 minutes of stretching and light exercise to warm up. Warming up prepares your body for more strenuous exercise by increasing circulation, raising your body temperature and delivering more oxygen to your muscles.

### WORKING OUT

Each workout should include 6 to 10 different exercises. Select exercises for every major muscle group with emphasis on the areas that you want to develop the most. To give balance and variety to your workouts, vary the exercises from session to session.

Schedule your workouts for the time of day when your energy level is the highest. Each workout should be followed by at least one day of rest. Once you find the schedule that is right for you, stick with it.

### EXERCISE FORM

You will gain the greatest benefits from exercising by maintaining proper form. This requires moving through the full range of motion for each exercise and moving only the appropriate parts of the body. Exercising in an uncontrolled manner will leave you feeling exhausted. Refer to the muscle chart on the next page to find the locations of the muscles.

The repetitions in each set should be performed smoothly and without pausing. The exertion stage of each repetition should last about half as long as the return stage. Proper breathing is important. Exhale during the exertion stage of each repetition and inhale during the return stroke. Never hold your breath!

FOLDING AND STORING THE BENCH

To fold the weight bench for storage, remove your barbell (not included) and any weights (not included) from the uprights or Leg Lever.

**Refer to the upper drawing:** Remove the Leg Lever (27) from the Front Leg. Remove the two Locking Knobs (34) and the two Small Locking Clips (16). Remove the Adjustment Tube (12) and lower the Backrest (10).

Lift up the Front Leg (37) and fold the Bench Frame (8) to a vertical position. Insert the Adjustment Tube (12) into the upper set of holes in the uprights. **Note: The Adjustment Tube must be between the Backrest and the Bench Frame.**

LOCKING THE BARBELL

To change weights while your barbell (not included) is on the uprights, secure your barbell with the Barbell Hooks (14). This will reduce the possibility of the barbell tipping while you are changing weights. Always place the same amount of weight on both sides of the barbell.

6. Insert a 1" Inner Cap (17) into the top of the Leg Lift Tube (18).
- Press a Leg Lift Bushing (19) onto the top of the Front Leg (37).
- Insert the Leg Lift Tube (18) into the Front Leg (37).

7. Attach the Weight Tube (21) to the Leg Lever (27) with a 5/16" x 2" Bolt (6), a 5/16" x 3/8" Spacer (22), two 5/16" Washers (23) and a 5/16" Nylon Locknut (7).
- Press a 1" Round Inner Cap (24) into the indicated end of the Weight Tube (21). Press a 1" Angle Cap (25) onto the indicated end of the Weight Tube. Slide a Weight Stop (26) onto the Weight Tube.
- Press a 1 1/2" Square Cap (4) into each end of the Leg Lever (27).

8. Lubricate the 3/8" x 2 1/2" Bolt (28) with petroleum jelly or another type of grease.
- Attach the Leg Lever (27) to the bracket (D) on the Leg Lift Tube (18) with the 3/8" x 2 1/2" Bolt (28) and the 3/8" Nylon Locknut (29).
- Insert the Large Adjustment Clip (20) through the indicated hole in the Leg Lift Tube (18) and lock it in place around the Leg Lever (27).

9. Insert a Pad Tube (30) into the lower hole in the Leg Lever (27), as shown. Slide a Large Foam Pad (31) onto each end of the Pad Tube.
- Insert a Pad Tube (30) into the upper hole in the Leg Lever (27), as shown. Slide a Large Foam Pad (31) onto each end of the Pad Tube.
- Insert a Pad Tube (30) into the hole in the Leg Lift Tube (18), as shown. Slide a Small Foam Pad (32) onto each end of the Pad Tube.

10. Attach the Backrest Brackets (11) to the Backrest (10) with three of the 1/4" x 5/8" Screws (9).

**Make sure the Backrest Brackets (11) are oriented exactly as shown in the drawing. To do this, take note that the threaded nuts in the Backrest (10) are closer to the edge on one end. The round holes in the Backrest Brackets must be pointed towards this end of the Backrest, so they extend beyond the Backrest itself.**

**Do not tighten the three Screws (9) yet.**

11. Insert the Adjustment Tube (12) into the middle set of adjustment holes on the uprights.

Place one end of the Backrest (10) on the Adjustment Tube (12) and slide the Backrest Bracket (11) that is attached with two screws onto the welded pin on the Bench Frame (8).

Swing the other Backrest Bracket (11) into place over the welded pin on the Bench Frame (8). Fasten the Backrest Bracket to the Backrest (10) with the remaining 1/4" x 5/8" Screw (9). Tighten all four Screws holding the Backrest in place.

12. Attach the Seat (13) to the bracket (E) on the Bench Frame (8) with two 1/4" x 5/8" Screws (9).

13. **Make sure all parts are properly tightened before you use the weight bench. The use of all remaining parts will be explained in Adjusting the Weight Bench on page 9.**

# Adjusting the Weight Bench

This section explains how to adjust the weight bench. See the EXERCISE GUIDELINES on page 11 for important information on how to get the most benefit from your exercise program.

Inspect and tighten all parts each time you use the weight bench. Replace any worn parts immediately. The weight bench can be cleaned with a damp cloth and a mild, non-abrasive detergent. Do not use solvents.

## ADJUSTING THE BACKREST

The Backrest (10) can be set to four different positions: a level position and three inclined positions.

To change the position of the Backrest (10), move the Adjustment Tube (12) to a different set of adjustment holes in the uprights.

## ATTACHING WEIGHTS TO THE LEG LEVER

To use the Leg Lever (27), slide the desired amount of weight (not included) onto the Weight Tube (21).

**WARNING: Do not place more than 125 pounds on the leg lever.**

## ADJUSTING THE HEIGHT OF THE LEG LEVER

To adjust the height of the Leg Lever (27), remove the Large Adjustment Clip (20). Slide the Leg Lift Tube (18) to the desired position and re-insert the Large Adjustment Clip.
